HOW TO MEASURE FULL CIRCLE ARCH ARCHITRAVES

Store: _____

Contact: _____

Phone No: (0 __) _____

Fax No. (0 __) _____

NOTE: We will supply the circular architrave in ONE PIECE

STEP 1: Measure H in mm: horizontal internal window width

STEP 2: Measure V in mm: Vertical internal window height as shown in diagram above

NOTE: If the window is a true circle, the Vertical and horizontal measurements will be the same

STEP 3: If your window is not a true radius, please supply template.

STEP 4: Add set back for architrave from inside edge of window frame (Quirk). Standard Quirk = 3 to 5 mm. See diagram above

STEP 5: To match your architrave profile/size of material/type of timber or MDF, please provide 100 mm long sample. It can be mailed.

STEP 6: Supply code of profile if available

EXAMPLE: How many windows the same _____ Generally 3-5 mm

CODE: _____ Quantity: 1 Horizontal: 783 mm Vertical: 783 mm + Quirk: 3 mm

MATERIAL: Size: 90 x 42 mm MDF LOSP T / PINE or OTHER _____
